

# Engineering Academic Resources

WUSTL  
SERVICES

## WUSTL Key

Your WUSTL Key is your Login ID and password for use of University systems. You can manage your account at <http://connect.wustl.edu>

## O365

Office 365 is a set of advanced email and collaboration tools including calendaring and skype. Each user is provided with 50GB mailbox. Find more information at <http://email.wustl.edu>

## File Storage & Collaboration

Washington University in St. Louis has partnered with Internet2 to provide WUSTL Box. It allows you to easily share and collaborate across the campus and the world. It provides unlimited data storage (HIPAA/FERPA compliant) and video streaming for all current faculty, staff and students. Login at <https://box.wustl.edu>

## Web Publishing Platform

*Sites* is WUSTL's self-service Web publishing platform, designed to give you a fast and easy way to independently create and manage your personal or lab website at no cost. Learn more at <http://sites.wustl.edu>

## Learning Management System

Blackboard is a Web-based learning management system (LMS) designed to support fully online courses or provide a space for face-to-face course supplementation. Features include: multimedia content, virtual meeting space, surveys, assessments, grade centers, messaging and email services, discussion boards, shared calendars. Find more at <http://bb.wustl.edu>

## Desktop Backup

WUSTL has chosen CrashPlan, available through Software Licensing, for desktop backups. An annual license of \$100 provides unlimited storage for up to 4 individual devices – Windows, OS X, or Linux. Data is encrypted, and WUSTL holds the encryption keys. Users can restore their own data.

## Cloud Computing

WUSTL has negotiated enterprise agreements with Azure, Amazon, and Google to provide discounted access to computing resources in those services. WUIT provides account management and billing; Engineering IT can provide support and consulting services – contact [support@seas.wustl.edu](mailto:support@seas.wustl.edu)

SEAS  
SERVICES

## Printing

The Engineering school provides multiple ways for students to print wirelessly, from a lab, or by swiping your id card at a Print release station. We also have poster printing available to all faculty, students and staff.

## Computing Lab Information and Scheduling

There are 16 computer labs that may be scheduled for teaching throughout the Engineering school. Find more information at <http://engineering.wustl.edu/eit>

## Academic Software

128 applications are available to students enrolled in Engineering classes, and can be made available in our labs, or, depending on licensing, directly to students.

## Remote Desktop Services

This system provides both single application and full desktop experiences to users from multiple high-performance servers which pool user sessions in a single, shared environment.

## A/V & Recording Services

There are multiple solutions available to facilitate remote presentations and online education.
